

Rahul Pote

Senior Software Developer

Mumbai, Maharashtra, India | rahul.pote.dev@email.com | +91 98765 43210 | linkedin.com/in/rahulpote | github.com/rahulpote

PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with 9+ years of experience designing, building, and scaling distributed systems and cloud-native applications. Proven track record of leading cross-functional engineering teams, driving architecture decisions, and delivering high-availability platforms serving millions of users. Skilled in backend systems, microservices, and DevOps practices, with a strong focus on performance, reliability, and mentorship.

TECHNICAL SKILLS

Languages	Java, Python, Go, JavaScript/TypeScript, SQL
Frameworks	Spring Boot, Node.js, React, Django, gRPC
Cloud & DevOps	AWS (EC2, S3, Lambda, EKS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions
Data & Messaging	PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ
Practices	Microservices, System Design, TDD, Agile/Scrum, CI/CD, Code Review

PROFESSIONAL EXPERIENCE

Senior Software Developer — Zenith Cloud Technologies

Mumbai, India | June 2021 – Present

- Led the redesign of a monolithic order-management system into 14 microservices, reducing average API latency by 42% and improving deployment frequency from weekly to multiple times per day.
- Architected and implemented an event-driven pipeline using Kafka and Go, processing over 20 million events daily with 99.95% uptime.
- Mentored a team of 6 engineers, established code review standards, and introduced automated testing that raised backend test coverage from 58% to 91%.
- Partnered with product and DevOps teams to migrate infrastructure to Kubernetes on AWS EKS, cutting infrastructure costs by 30%.
- Drove the adoption of CI/CD pipelines with GitHub Actions and Terraform, reducing release cycle time by 60%.

Software Development Engineer II — Bluewave Fintech Solutions

Pune, India | July 2018 – May 2021

- Built core payment-reconciliation services in Java/Spring Boot handling 1M+ daily transactions with sub-200ms response times.
- Designed a fraud-detection rules engine integrated with real-time transaction streams, reducing false positives by 25%.
- Owned the PostgreSQL data layer for the billing platform, optimizing queries and indexing strategies that improved report generation speed by 3x.

- Collaborated with QA to implement contract testing across 10+ services, cutting integration bugs in production by 35%.

Software Engineer — Nimbus Data Systems

Pune, India | August 2015 – June 2018

- Developed RESTful APIs and internal tools using Python/Django for an analytics dashboard used by 200+ enterprise clients.
- Implemented caching layer with Redis that reduced average page load time by 45%.
- Participated in on-call rotation and resolved production incidents, maintaining 99.9% service availability.

EDUCATION

Bachelor of Engineering in Computer Science

University of Pune | 2011 – 2015

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Administrator (CKA)
- Google Professional Cloud Developer
